

# Solid Waste Impacts

The graph below shows the amount of solid waste that would be generated under each scenario.

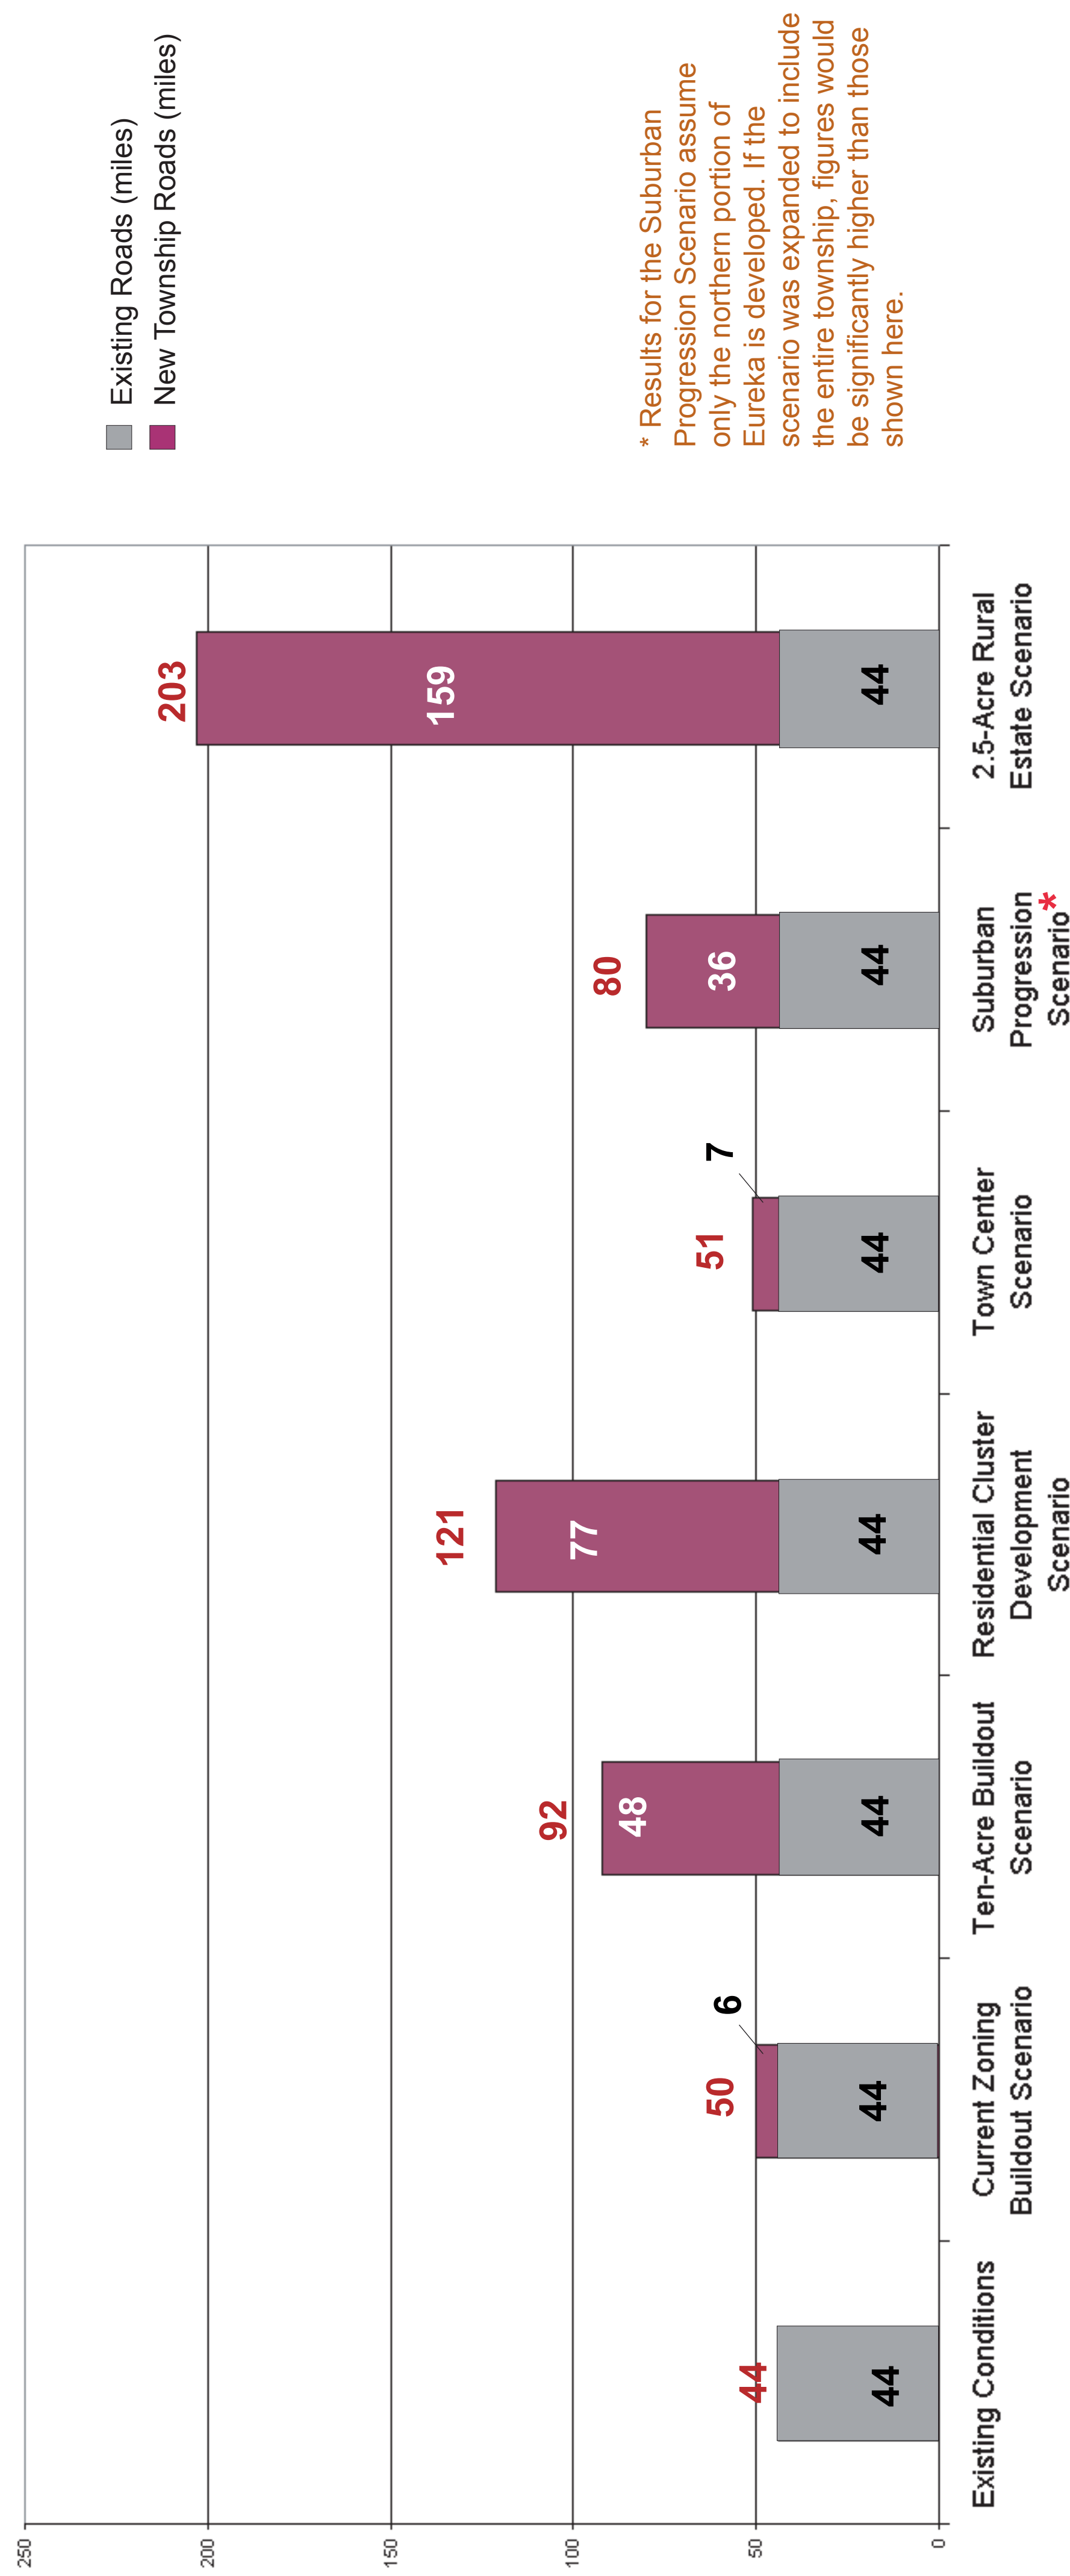

\* Results for the Suburban Progression Scenario assume only the northern portion of Eureka is developed. If the scenario was expanded to include the entire township, figures would be significantly higher than those shown here.

# Infrastructure Impacts

The graph below shows the amount of new roads in the Township required by each scenario.

Even though the Residential Cluster Scenario and 10-Acre Buildout Scenario assume the same number

of new homes, the Residential Cluster Scenario would require more new roads in order to locate homes away from existing roads, wetlands, natural areas, and farmland. Most homes under the 10-Acre Buildout Scenario would be accessible from existing roads.

\* Results for the Suburban Progression Scenario assume only the northern portion of Eureka is developed. If the scenario was expanded to include the entire township, figures would be significantly higher than those shown here.
